

Extension Ring 10

Please follow the instructions below to mount the Extension Ring 10 on a port.

1. Remove the bayonet ring from the port by unfastening the M2.5 x 6 screws.
2. Align the circle mounting indices of the Extension ring 10 and the port then attach the Extension ring 10 to the port, ensuring that there is no gap between the two.
3. Place the bayonet ring on top of the Extension ring 10, with one of the inward castellations aligned with the circle index.
4. Fasten the M2.5 x 16 screws to secure the bayonet ring to the Extension ring 10 and the port.
